An SKV brand gear shift knob installation / replacement procedure - step by step guide.

In a few simple steps, you will be able to install your SKV shift knob fast & trouble-free.

Step 1: Dismantling the old knob

Depending on how the knob is mounted on the gear shift lever, it can be unscrewed or removed with a bit of a pull.

Step 2: Cleaning the gear shift lever

Thoroughly clean the lever of any loose plastic part's bits that may hinder the stable installation of a new gear shift knob.

Step 3: Commence fitting of a new part

Prepare all the elements included in the gear shift knob kit, such as a spring or clamp, to ensure the proper functioning of the replaced part.

Step 4: Placing the gear shift knob on the lever

Gently place the new knob, and carefully align it with the rest of the kit on the lever.

Step 5: Screwing on or pressing the gear shift knob onto the lever

Push or tighten the new shift knob on the lever until it is completely secured.

Step 6: Checking the correctness of the assembly

Adjust the knob position to match the orientation of the gear shift pattern. Make sure the knob is firmly in place and there is no play.
